

### Reference letter

KazGerMunai LLP has been working with Corrocoat Caspian LLP since 2016. Corrocoat Caspian LLP is supplying Polyglass VEF anticorrosion coatings to the Nuraly oilfields in Kyzyl-Orda region operated by KazGerMunai LLP. These materials are manufactured locally and are used for internal lining of process vessels such as oil separators.

Polyglass materials have been chosen by us for being resistant to highly aggressive environments in the oil industry including high chloride concentrations at high temperatures and pressures.

Since the start of our business relationship Corrocoat Caspian LLP has proven to be a reliable and committed partner. Manufacturing and delivery of all requested materials to Kyzyl-Orda are done in shortest times with coordinated logistics. Corrocoat Caspian LLP has also provided supervising and training on application and is always open for technical advice.

Our company is fully satisfied with the quality of products and services of Corrocoat Caspian LLP and plans to continue such a long term relationship with this partner.

Best regards,

Deputy General Director for production

Abdirakhmanov N.B.
