Reference letter

Almaty Yeast Plant has been working with Corrocoat Caspian LLP since April 2017. Corrocoat Caspian LLP has fully refurbished a pump for orthophosphoric acid (73% concentration) by using Polyglass VEF coating manufactured locally.

Polyglass VEF material has been chosen by us for being resistant to highly aggressive environments such as orthophosphoric acid at high concentrations and high temperatures.

Repair of the pump was done in shortest times at Corrocoat Caspian facility in Almaty. Corrocoat Caspian LLP is always open for technical advice.

Our company is fully satisfied with the quality of products and services of Corrocoat Caspian LLP and plans to continue such a long term relationship with this partner.

Best regards,

Ilya Bratishko

Technical Director

Almaty Yeast Plant JSC
