### Informational letter

In January 2016 “Corrocoat Caspian” LLP has been announced to perform works of protecting internal surface of chemical vessel ССЭрН-10 from corrosion in the environment of Sulphur acid up to 30%, fats, oil and oil contamination in temperature of 110 C. These works have been done at our company’s facilities.

All works have been completed as per the Contract terms, where Corrocoat fulfilled all our requirements, HSE procedures and sanitary rules.

We also would like to point out that Corrocoat Caspian’ team flexibility to our schedule and adjusting works to our manufacturing conditions, which allowed us to avoid of shutting down working facilities and delays in manufacturing process.

Chairman of the Board

Pletnikov G.V.
