«Promzapchas»t LLP

the proceeding No. № 53 от «29» July 2016y.

Reference letter

Our company has been working with Corrocoat Caspian LLP since September 2015. Corrocoat Caspian is supplying Polyglass VE and Polyglass VEF anticorrosion coatings to the Shatyrgul copper mine in Zhambyl region operated by Dank LLP.

Our company has chosen Polyglass series materials for being resistant to aggressive environments – acids, high temperatures and abrasion. Another advantage is that these coatings are manufactured locally in Kazakhstan under the licensed technology of Corrocoat Ltd UK.

We use Polyglass materials for internal lining of steel tanks and vessels – reactors and drums – for protecting the surface from sulphuric acid (upto 50% concentration) at high temperatures (upto 80°C).

Since the start of our business relationship Corrocoat Caspian LLP has proven to be a reliable and committed partner. Manufacturing and delivery of all requested materials are done in shortest times with coordinated logistics. Corrocoat Caspian has also provided training on application and is always open for technical advice.

Our company is fully satisfied with the quality of products and services of Corrocoat Caspian LLP and plans to continue such a long term relationship with this partner.

Technical director of «Promzapchas»t LLP

Abdualiyev S. K.
